

ADA VILLAGE Parking Guidelines

The following principles and recommended practices have been developed by the Ada Township DDA to encourage effective use of the available parking supply, both public and private, in the Ada Village.

For Business Owners & Employees:

- Parking that is closest to businesses and most visible to passing motorists should be made available for use by patrons.
- Business owners, managers and employees should be encouraged or required to park in more remote parking spaces that are less convenient for use by customers.

For Visitors to the Village:

- The map on the inside of this brochure identifies public parking in the Village, both on-street and off-street.
- The Village is a relatively small place. Nearly all public parking in the Village is no more than a 5 minute walk to your destination, and the walk is likely to be a pleasant and interesting one.
